ARTICULATED DUMPERS

2,200 - 3,300 lb

AUSA's most compact range of dumpers, available with two different payloads and they can be configured with a high-tipping skip or a swing skip.

These models are perfect for municipal works, landscaping projects, small demolitions, or any applications that require highly maneuverable vehicles that are extremely compact in size.

Thanks to their permanent 4WD, they can handle narrow terrain and steep slopes.

FEATURED EQUIPMENT

Folding ROPS for ease of transportation. **Spacious driver's position** for comfortable and safe handling. **Rotating beacon** for increased visibility on the jobsite. **Hydrostatic transmission** to ensure smooth and safe operation for the user. **Easy-to-access components** to reduce downtime for maintenance. **Ergonomic joystick** that controls the movements of the skip and the transmission. **Seat belt with a buckle sensor and seat with presence sensor** to prevent the machine from being used without following the minimum safety procedures. **Negative brake** that is applied automatically when the motor stops.

ARTICULATED DUMPERS

4,400 - 6,600 - 7,700 - 9,900 lb

Dumpers designed for major earthworks in urban and intercity environments settings or in private residential areas. They have an excellent power-to-weight ratio, making them maneuverable and allowing them to easily tackle with steep slopes.

All components have been designed to ensure quick and simple maintenance with minimal downtime.

FEATURED EQUIPMENT

Folding ROPS for ease of transportation. **Spacious driver's position** for comfortable and safe handling. **Hydrostatic transmission** to ensure smooth and safe operation for the user. **Easy-to-access components** to reduce downtime for maintenance. **Ergonomic joystick** that controls the movements of the skip and the transmission. **Seat belt with a buckle sensor and seat with presence sensor** to prevent the machine from being used without following the minimum safety procedures. **Negative brake** which is automatically engaged when the engine is turned off.

ARTICULATED DUMPERS

13,200 - 22,000 lb

Our range of dumpers with the highest payloads are designed for large-scale earthworks, especially on intercity construction sites and in open spaces. These are powerful and robust models that are equipped with the latest technology to minimize fuel consumption.

They also have a digital display in the driver's cab which provides all of the machine's real-time information, allowing you to run self-diagnostics without the need for any external tools.

FEATURED EQUIPMENT

Digital screen to access machine information and on board diagnostics. **Smart Stop** (optional), which switches off the machine's engine when it is not in use, to reduce running cost. **Easy-to-access internal components** to reduce costs and facilitate maintenance. **The limited-slip differential** on both axles offers market-leading off-road drive capabilities. **Seat belt with a buckle sensor and seat with presence sensor** to prevent the machine from being used without following the minimum safety procedures. **Negative brake** which is automatically engaged when the engine is turned off. **Camera with 360 degree vision** on the skip.

POWER 74.3 hp **WIDTH** 94.9 in **TRANSMISSION** TORQUE CONVERTER

REVERSIBLE DUMPERS

13,200 - 22,000 lb

The reversible design allows the entire driver's cab to turn 180°: seat, steering wheel, pedals, joystick...giving the operator a clear view of their surroundings at all times. This system also allows you to always use front-wheel drive, thus reducing the number of maneuvers and increasing load-moving speed.

AUSA's reversible dumpers are equipped with the latest technology to reduce fuel consumption and improve the safety of the operator and area around them.

FEATURED EQUIPMENT

Access to the driving position on both sides of the machine. **ECO Mode** to automatically regulate the RPM to ensure low consumption and reduced maintenance costs. **Digital screen** with all of the information about the machine and self-diagnostics. **Hill holder**, which keeps the machine stationary on any slope, without putting your foot on the brake. **The limited-slip differential** on both axles offers market-leading off road drive capabilities. **Smart Stop**, which switches off the machine's engine when it is not in use, to make it more cost-effective. **Negative brake** which is automatically engaged when the engine is turned off. **Camera with 360 degree vision** on the skip.

ELECTRIC DUMPER

2,200 - 3,300 lb

Electric power for the whole day. AUSA's electric dumpers have been designed with an operating range to complete a busy working day without needing to be recharged.

With the charging cable built into the machine, they can be connected directly to the mains via a 110 V or 230 V socket or a 415 V socket with a fast charger.

Thanks to their minimal noise emissions, they can be used in a wider range of applications than traditional dumpers, and in works that are carried out at night.

The li-ion battery pack is controlled electronically to deliver smooth maximum power and all-terrain performance that matches diesel vehicles.

FEATURED EQUIPMENT

Charging cable in the vehicle, so it can be plugged in at any time. **Folding ROPS roll bar** to make it easier to transport. **Driving position with plenty of space** for comfortable and safe driving. **Digital screen** to access machine information and on board diagnostics. **Hill holder**, which keeps the machine stationary on any slope, without putting your foot on the brake. **Easy-to-access components** to reduce downtime for maintenance. **Ergonomic joystick** that controls the skip movements and the transmission. **Seat belt with a buckle sensor and seat with presence sensor** to prevent the machine from being used without following the minimum safety procedures. **Negative brake** that is applied automatically when the motor stops. **Energy recovery system** that increases the battery range.

All AUSA dumpers can be equipped with AUSAnow, the software used to remotely control machines, providing you with all real-time information.

Control your fleet of machines

From your office or with your mobile phone. Control all of your AUSA machines in real time. With AUSAnow you can anticipate any faults and maintenance, to reduce downtime.

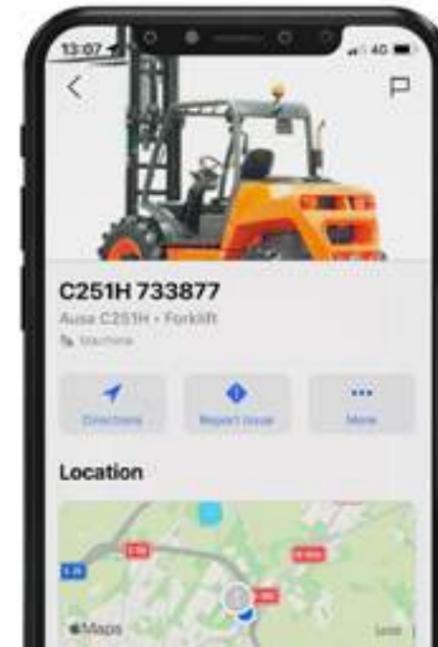

Get information and make decisions

View or create your own personalised charts to obtain in-depth information about the operation of your machines and make decisions that are based on analytical information.

Connect security alarms

Establish a schedule and security perimeter. If one of your machines is moved outside the established area, AUSAnow will alert you straight away so that you can deal with it.

Data, data and more data

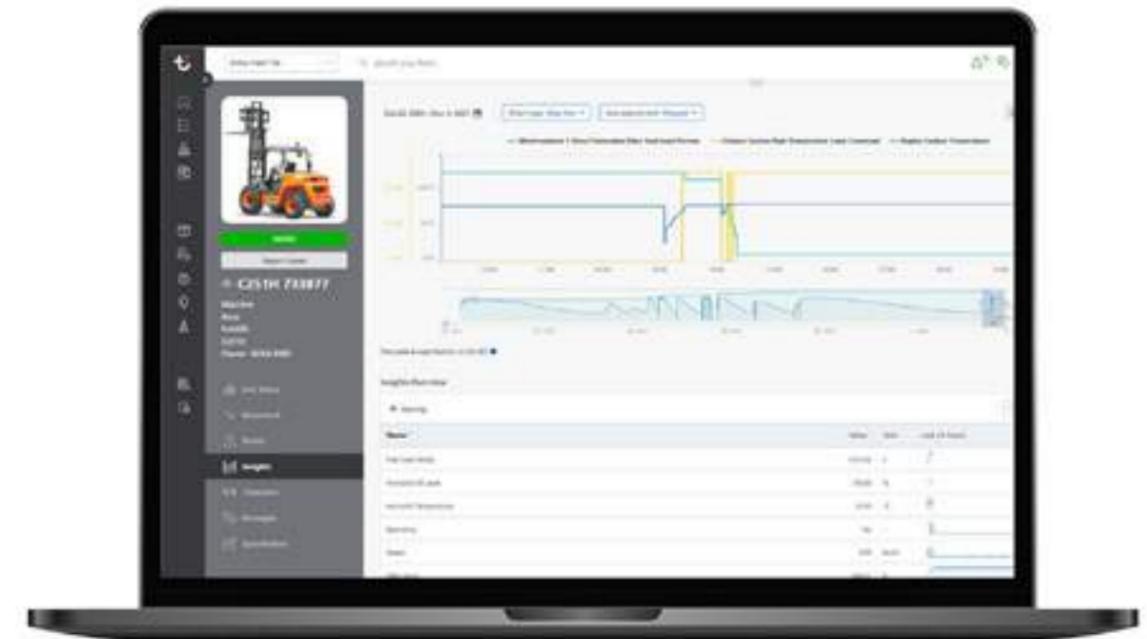

AUSAnow allows you to obtain advanced real-time information about your machine fleet. View advanced charts for customized time periods based on the parameters set by you.

Reduce downtime

AUSAnow connects you to your dealer or rental company, so that any appropriate maintenance can be performed. If you have a problem, AUSAnow provides you with a direct channel of communication with your machine vendor, so that it can be resolved as quickly as possible.

- Preventive alerts
- Attach images

Alarms for your peace of mind

Activate AUSA's recommended maintenance alerts and keep your machines in optimal condition. And, for your security, you can program geofences and receive alerts if they go outside the established boundaries.

- Customize a schedule
- Set a perimeter
